CUSTOM FORMULATION

Selling innovative polymers under your own brand?
Contracting out the formulation or production
of your resin systems?
Developing new resin systems?

RESOLTECH is a fast growing, highly creative, polymer formulator located in the South of France. The company boasts a current range of over 800 systems, most of which were developed in close cooperation with customers. In addition to these, RESOLTECH also supplies reinforcements, cores and a selection of technical services.

RESOLTECH works with your executives to create the specific product you need: from the first stage of product definition through to development, testing, formulation and production. Once the product is approved, you can choose to manufacture it yourself or ask RESOLTECH to make it and package it under your own brand and packaging. Full confidentiality is maintained throughout the process. Exclusive rights can be granted under contract.

The RESOLTECH custom formulation service has a very impressive track record; high performance products that were created with our customers include water based epoxy systems, epoxy compounds that can withstand up to 1100C temperatures, adhesive that work harder, infusion resins with a viscosity as low as 160cps, easy to use retail packs and much more. These can be packaged for retail or industrial use in packs ranging from 100ml to 300kg or even full containers.

Please contact us for more information about the most flexible and cost effective formulation service in the composite world. We can help you win new markets and sharpen your competitiveness with higher performance polymers.
