

Just Add Water!

A REVOLUTION IN WOOD-EPOXY CONSTRUCTION

Resoltech has been expanding the **FORMULA WOOD** range for 5 years, with innovative performance products. Yet, **Resolcoat 1010** is the most advanced system ever launched, a wood coating system which uses water as a thinner. It is both safer and more economical to use.

FEATURES:

- **Ease of use (1/1 mixing ratio).**
- **Ultra low toxicity.**
- **Not moisture sensitive.**
- **Good surface finish (High gloss or Matt).**
- **Long pot life & fast curing time.**
- **High adhesion to timber.**
- **Over coating without prior sanding.**
- **Part of the FORMULA WOOD range.**

TRY IT!

You can try 1010 and see for yourself, free of charge. Just forward your details by fax or mail to:

Fax# +33 442 950198
export@resoltech.com

You will receive a free sample of 1010 with the data sheet by return.

WOOD COATING WITH 1010

The system was developed to ease and optimize all aspects of wood coating. Mixing is easy with a ratio of 1 to 1 by volume + 1 water. Both resin and hardener should be stirred prior to adding water.

Resolcoat 1010 can be brushed or rolled. It penetrates wood easily. Being water based, the system is not sensitive to damp timber. Tools can be cleaned with water, a much cheaper and safer solution than acetone.

1010 is probably the easiest epoxy system to use: easy mixing ratio, long pot life combined with a short curing time, does not require sanding prior to applying additional coats and easy to overcoat since it has a milky aspect prior to curing.

Resolcoat 1010 is suitable for all timber products as well as metals. It is however not suitable for fiberglass lamination.

The range of applications is almost endless: marine structures coating, floors sealing, metal protection, primer before painting, keels coating, renovations, etc.

More information is available from our technical services. The **FORMULA WOOD** range also includes additives, fibre reinforcements and more.

THE FORMULA WOOD RANGE:

- 1020. Multipurpose system.**
- 2040. Epoxy fillet compound.**
- 1010. Coating system.**
- 8020. Filler.**
- 3010. High build surfacer.**
- Fabrics & additives.**
