

# art architecture decoration

**Resoltech supplies a whole range of resin systems for art, architecture and decoration. These let you create bolder designs, new shapes, finishes, decorative floors and unique atmospheres.**

**The Resoltech advanced solutions enhance your creativity in art, architecture and decoration. Furthermore, they protect your creation from water, UV aggression and wear. Resoltech pushes the limits of your creativity further.**

## CLEAR CASTINGS

WWA is an epoxy casting system that provides more advantages and features: it is clear (and can be pigmented), UV stable and easy to use. It does not contain any solvent, does not retract while curing and does not entrap air bubbles.

WWA is available in 2 versions: a hard version for free castings, and a flexible version for castings inside glass containers.

WWA has been used for large castings as well as small ones. Its inherent qualities make it the choice material for quality castings.

WWA is also available with PHOSPHORESCENT pigments.

## WOOD & FLOOR COATINGS

A range of clear, UV stable epoxy systems for enhancing and protecting timber surfaces. These systems are totally waterproof and preserve the aspect of the wood as well as enhancing its grain and patterns.

## DOMING

Doming is a fast growing market, with a large number of items being made: keyrings, badges, documents and other creations. Resoltech offers the VLS UV epoxy system as well as the Resolthane TR041 polyurethane system.

## FLOORS

You can produce decorative floors using the RESOLCOAT 1010 mixed with various materials: marble powder, pebbles, stones & pigments to create unique designs. Resolcoat 1010 is a water based epoxy system that will produce an easy to work mortar.

RESOLTECH also produces water based floor coatings in any colour you may dream of.

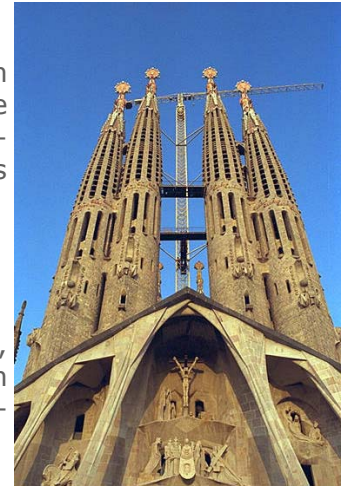

## PROPS & SETS MAKING

Props are widely used in the TV, film and theatre business. Resoltech supplies resin systems, fillers, foam blanks and coatings that enhance your creativity and enable you to produce props efficiently. These include epoxy systems that do not dissolve polystyrene, fillers, resins and fiberglass for sheathing.

## ARCHITECTURAL SOLUTIONS

Solutions for buildings: concrete sealants, carbon fiber reinforcing, high strength adhesives, roofing solutions. These are found on modern buildings as well as historical renovations, including the Sagrada Familia in Barcelona.

## DECORATIVE LAMINATES

Carbon fibre laminates are increasingly popular for vehicle, motorcycle and other elements where the special grain of a carbon fibre cloth is enhanced by a deep gloss varnish. Resoltech supplies carbon fabrics, 1070 clear resin and VLS UV as a hard wearing topcoat.

## POOLS

Polymer solutions for pools coating and renovation. From the RESOLTECH poolcoat epoxy coating to timber treatment.

## RENOVATIONS

A large selection of materials and coatings for renovations of floors, statues, concrete structures and more.
